STATION SUPERINTENDENTS AT COLLEGE

Discussing with Director Youngblood Matters for the Betterment of the Service.

One of the most important meetings held at A. & M. College in a long time is now in session. It is a meeting, or rather a conference, between Director Youngblood of the Texas experiment stations and the superintendents of each of the sub-stations in the state.

The matters under discussion in the meeting, as furnished The Eagle, are as follows:

To familiarize the superintendents with the business details of the stations.

To outline the work to be done by the stations during the coming year.

To offer suggestions for the betterment of the stations, and how they may be of greater service to the farmers and people generally in the communities where they are located.

From the above it will be seen that the objects of the meeting are good; in fact, of the very greatest importance, and their discussion by the body of earnest, practical men composing the directorate of the stations can not help but result in great good to every branch of agriculture in the state of Texas.

All the superintendents are present, as follows:

Angleton, Brazoria county, P. D.

Perkins.

Beeville, Bee county, A. T. Potts.
Beaumont co-operative rice experiment farm, Jefferson county, E. M. Johnson.

Denton, Denton county, T. W. Buell.
Lubbock, Lubbock county, A. L. Paschall.

Pecos, Reeves county, H. C. Stewart.
Spar, Dickens county, I. S. York.
Troupe, Smith county, W. S. Hotchkiss.

Temple, Bell county, H. C. Holmes.
Nacogdoches, Nacogdoches county, G. G. McNess.

GOVERNMENT WANTS BRIGHT AGRONOMIST

Washington, Jan. 12.—The United States is in need of a capable agronomist. Anyone filling the bill may take the civil service examination tomorrow and if successful will be placed on Uncle Sam's pay roll for \$2400 a year. The duties of the position will consist in conducting experiments in the adaptation and breeding of varieties of oats and in studying the methods of cultivation, harvesting and threshing of this grain and its use as a cereal. Such investigations involve much traveling during the growing season, with laboratory work during the winter at Washington. The position comes under the bureau of plant industry in the department of agriculture.

FOUNDER OF BOY SCOUTS COMING

General Baden-Powell, Hero of Mafeking, Will Tour United States.

Washington, Jan. 12.—Official and military circles in the national capital are looking forward with interest to the prospective arrival in this city, toward the end of the month, of Maj. Gen. Robert Stephenson Smyth Baden-Powell, the hero of Mafeking, who has started from England on a tour of the world, and is expected to spend several weeks in the United States, visiting a number of the large cities in various parts of the country. One of the objects of his tour is the solidification of the Boy Scout movement, of which he is the father, into an international organization.

After the Boer war he organized the South African constabulary and served as inspector general of the constabulary until 1903, when he was appointed inspector general of cavalry and returned to England, where he became the lion of society and extremely popular not only with the army but with people in general. He never married and devoted his spare time to outdoor sports and the writing of books on hunting, scouting and various other military subjects.

SENATOR BAILEY TO SPEAK

Washington, Jan. 12.—Senator Joseph W. Bailey of Texas has notified Senator Duncan U. Fletcher, president of the Southern Commercial Congress, that he consents to deliver the opening oration of the fourth annual convention of the Southern Commercial Congress in Nashville, Tenn., next April. The subject will be "The Mississippi Valley." His treatment of this subject will emphasize the importance of the Mississippi Valley as a whole in national development, past and future.

Senator Bailey was the unanimous selection of the executive officers of the congress for this important place on the Nashville program after carefully weighing the ability and powers of more than one hundred men of national reputation.

He is a Mississippian by birth, was a student in Vanderbilt University, and as a Texan has become known throughout the United States. The scope of the whole program will deal with "The South's Educational and Agricultural Recovery," and the meeting is located in the Mississippi Valley because it includes two-fifths of the United States and because it is the most important element in the agricultural future of the nation.

THREATENED STRIKE OF BRITAIN MINERS

London, Jan. 12.—The balloting by the Miners' Federation of Great Britain to determine whether or not the organization shall stand firm in its present dispute with the mine owners concluded today. The votes of the members, numbering between 600,000 and 700,000, will be forwarded to the general secretary and the result of the election will be made known at the national conference which is to assemble in Birmingham next Thursday.

Though hopes are still expressed that the threatened strike may be averted, there is no denying the fact that the outlook is causing much uneasiness. Two months remain to the peace-makers, as the present agreement between the miners and operators will not terminate until the end of February.

The question of a minimum wage is the bone of contention. The miners appear to be determined in their demand that such a clause shall be incorporated in the next agreement. The great majority of the mine owners, on the other hand, are strongly opposed to it, and they argue that the granting of the men's demands would lead at once to the closing of many collieries which are at present being worked on a small margin of profit.

Harmon Opens Campaign.

East St. Louis, Ill., Jan. 12.—Governor Harmon of Ohio arrived here today to deliver the first speech in Illinois in his campaign for the democratic presidential nomination. The address is to be delivered at a mass meeting arranged by the St. Clair County Democratic Club.
